

Permedio is the center for personalised medicine in Lower Austria.

Permedio searches a data scientist with the following profile:

- Experience in programming in Python, possibly R.
- Experience in Analytics (e.g.: machine learning, SVM, PCA, etc.)
- Experience in data retrieval from different sources: databases, structured files (*.csv and *.json e.g.)
- Interest in and possibly some knowledge of graph databases and advanced data visualisation techniques
- Interest in international collaboration
- Interest in being directly involved in the knowledge transfer from CERN engineers and experts to Permedio; this implies visits at CERN as well as video/telephone calls
- Good command of English for the collaboration with CERN; regular working meetings are in German
- Ideally (not obligatory) interest in medical research questions and applications, esp. genomics
